

What is Botanical Wax?

Swan Creek Candle Company has developed our own unique blend of soy bean waxes, palm oils and other natural materials to bring you the highest quality natural wax candles.

By custom blending these natural materials, we are able to create a 100% natural wax blend, thus our "botanical" wax.

We have responded to consumers concern about soot, smoke and lead. All candles, unless noted, are made from our new improved, clean burning natural botanical wax.

Swan Creek Candle Co. wicks are lead free.
