Fragrant Sea Salts

Atlantic Sea Salt Crystals

Pure Atlantic sea salt crystals are from the clear waters off the coast of Brazil. The large crystals are semi porous which enables them to be infused with color and Fragrance Oil. When heated, the crystals slowly release fragrance into the air. Heating sea salt has many purported health benefits including reducing a wide range of indoor air pollutants by releasing negative ions from the salt's ability to absorb water and then evaporate. Sea Salt Crystals are stunning alone, in the bottom of vases and Hurricane Lanterns, or simply in a jar on the shelf. The fragrance can be enjoyed with or without heat. We've drenched our Sea Salt Crystals in 3 pleasing home fragrances.
